Explanatory Notes

10 General information

“Intercapital Property Development” ADSIC- the parent company.

“Intercapital Property Development” ADSIC is a company registered in accordance with the Special Purpose Vehicles Act. The Company operates as a collective investment scheme for real estate; “real estate securitization” means that the Company purchases real estate with cash flows accumulated from investors by issuing securities (shares, bonds).

The Company is registered as a stock company and is entered in the Commercial Registry in the Sofia City Court, company case № 3624/2005, batch № 92329, volume 1204, reg. 1, page 23. The Bulstat Code is 131397743. The legal seat and the address of the Company`s management is Dobrudja Str. № 6, 4th floor, Sofia.
The Board of directors is composed as follows:

- Velichko Klingov,
- Tsvetelina Hristova.
- AHELOY 2012 EOOD

Currently, the Company has no Investor Relations Director appointed.
Service companies of “Intercapital Property Development” ADSIC in compliance with the clauses of the Special Purpose Vehicles Act are: Optima Audit AD, Marina Cape Management EOOD, IP Intercapital Markets AD, and AD Tokushev and Partners. Independent appraiser of the properties is Dobi 02 EOOD.

The Company`s shares are listed for trading on the Bulgarian Stock Exchange – Sofia AD and on the alternative trading system NewConnect, organized by the Warsaw Stock Exchange.

11 Basis for the preparation of the consolidated financial report

The Company’s consolidated financial report is prepared in compliance with the International Financial Reporting Standards, developed and published by the International Accounting Standards Board (IASB) and adopted by the European Commission.

The financial reports of the company have been prepared in compliance with the international standard for financial reports, adopted by the Comission of the EU. They include the International Accounting Standards (IAS), the International Financial Reporting Standards (IFRS) and the interpretations for their application (SIC - IFRS interpretations). IFRS also include the subsequent amendments and complements to these standards and interpretations of their application and the future standards and interpretations for their application prepared by the International Accounting Standards Board (IASB).

The financial statements are prepared in BGN which is the functional currency of the Company. All amounts quoted are in thousands of BGN ('000 lv) (including the comparative information for 2017) unless otherwise specified.

12 Going concern

The consolidated financial report has been complied in compliance with the going concern principle.

As of 30.06.2018 the company registers a loss for the period in the amountof BGN 866 thousand and a negative cash flow from operating activities in the amount of BGN 85 thousand. The sum of current liabilities exceeds the sum of current assets by BGN 18 036 thousand.

In 2017 the company declared a profit for the period in the amount of 331 thousand BGN and a negative cashflow from operating activities in the amount of 242 thousand BGN. The current liabilities exceeded the current assets by 17 939 thousand BGN.

These circumstances show considerable uncertainty which may result in considerable doubt regarding the company's ability to continue to function as a going company without the support of the owners and other financing sources.

The Company has failed to generate enough cash flows and therefore failed to pay off the due interest as of 14.08.2017 in the amount of EUR 32 610 and principal in the amount of EUR 125 000. As a result, on 24.10.2017 the company was notified that the trustee of the issue, Investbank AD, announces the entire bond issue of the issuer as a pre-term chargeable. For more details, please note.14.3. Bond issue.

The management has taken the following, more considerable measures to improve the financial condition of the Company:

- The Company has rescheduled its short-term obligations towards the banks, as a result of which interest payables have been written off in the amount of BGN 12 604 thousand which improved the company's financial condition.
- As a result of the rescheduling of the obligations, mortgages have been raised on part of the company's property which has enabled it to fulfill a large part of its obligations towards its clients.
- The Company carries out expense optimizing policies, inventories, and other elements of the working capital. The expected result from these measures is considerably improving the liquidity of the Company.

The management believes that based on the forecasts for the future development of the Company and the measures taken, and the support of some shareholders and the thorough work of the Board in restructuring of the financing and searching for new low interest financing, it will be able to continue its activities and the repayment of its obligations without selling assets and without undertaking any substantial changes in its activities.

13 Amended accounting standards

Implementation of new and revised International Financial Reporting Standards (IFRS)

New and amended standards

The Company has taken into consideration the following new standards, changes and interpretations of IFRS, developed and published by IASB, which are mandatory for application since the reporting period beginning on 1st January 2018

IFRS 15 "Revenues from customers' contracts" in force for annual periods from 01.01.2018. This standard is a completely new standard. It introduces a comprehensive set of principles, rules and approaches for the recognition, accounting, and the information disclosure in regards to the sort, amount, period and the insecurities in relation to the revenues and cash flows, arising from contracts with counterparties. The standard will replace the current standards related to the recognition of revenues, mainly IAS 18 and IAS 11. The leading principle of the new standard is in the creation of a model of steps, through which the determination of parameters and the time of revenue are commensurated with the obligation of each party to their dealings among them. The key components are: a) contracts with customers of commercial nature and an estimate of the probability of collecting the contracted amounts from the enterprise according to the conditions in the given contract; b) identification of the separate liabilities for execution in the contract for goods and services – delimitation from the rest of the taken commitments in the contract, from which the client could take advantage of; c) determining the price of the transaction – the amount, which the enterprise expects to have the right to receive against the transfer of the respective goods or services to the customer – special attention is given on the changeable component in the price, the financial component, as well as in the component, received in kind; d) distribution of the price of the transaction between the separate obligations for the execution of the contract – usually on the basis of an independent sale price of each component; and e) the moment or the period of income recognition – at the successful execution of the obligation in the contract through transferring the control over the promised goods or services, for a given moment or for a certain period in time. The assumption is that the introduction of this standard can lead to the following changes: a) in complex contracts with tied sales of goods and services – it will be necessary a clear differentiation between good and services of each component and a condition in the contract; b) probability of change of the moment of sale's recognition; c) increase of the disclosures; and d) introducing of additional rules for income recognition from a certain type of contracts – licenses, consignations, one-off pre-tax charges, guarantess and others. The standard permits not only a full retrospective application, but also a modified retrospective application, from the beginning of the current reporting period, with defined disclosures for the previous periods;
IFRS 15 Revenues from customers'contracts – explanations (in force for annual periods from 01.01.2018 – it is not accepted by the EC). These explanations are related to a) identifying of the obligations for execution on the basis of concrete promises for the stock or service delivery, b) identifying whether the Company is a principal or an agent in the supply of goods or services, and c) transfer of licenses. Also, this change provides reliefs with the transition to the new standard;

The management intends to apply the standard retrospectively, recognizing the cumulative effect of the primary application of this standard as a change in the initial balances of the non-distributed profit at the date of the initial application. According to this method IFRS 15 will be applied only in contracts, which have not been terminated to 1st January 2018.

IFRS 9 "Financial instruments" in force for annual periods from 01.01.2018. This standard is a new standard for financial instruments. Its ultimate purpose is to replace completely IAS 39. It establishes new principles, rules and criteria for classification, evaluation and wring off the financial assests and liabilities, incl. the hybrid contracts. IFRS 9 introduces a requirement the classification of the financial assets to be made based on the business model of the Company for their management and the characteristics of the agreed cash flows of the assets concerned. It defines only two main categories of assessments – at amortizable and at fair value. The new rules will lead to changes majorly in the accounting of financial assets as debt instruments and of financial liabilities accepted for accounting at fair value throughout the current profits and losses (for the credit risk). A peculiarity at the classification and the assessment model for the financial assests at fair value is added the category – with an assessment at fair value during the other comprehensive income (for some debt and equity instruments). Hedge accounting – for this purpose a new chapter is introduced in IFRS 9, by which a new model for hedge accounting is introduced which allows consequent and complete coverage of all financial and non-financial risk exposures, subject to hedging operations, and better presentation of risk management activities in the financials statements, especially their relationship with the hedging deals and the scope and the sort of documentation, which to be used. Further, it is introduced the option the accounting of the changes at the fair value of the own debts, assessed at fair value through profit or loss, but in the part, due to changes in the quality of the own creditworthiness of the Company, to be presented in the other comprehensive income instead of profit or loss. The enterprises applying IAS 7, will be able to accept this option as a policy, as well as, will be able to continue applying the requirements for the accounting of hedges at fair value at interest rate exposure according to the requirements of IAS 39, even after IFRS 9 takes effect. The methodology of determining the impairment – the change offers an application of the "expected loss" model. According to this model all expected losses of an amortizable financial instrument (asset) are recognized at three stages depending on the change of its credit quality, and not only when the event crystallizes, as it is in the current model in IAS 39. The three stages are: the primary recognition of a financial asset – impairment for 12-month period or for the whole life of the asset; and accordingly – when the actual impairment occurs. They define how to be measured the losses from the impairment and respectively the application of the effective interest rate;

IFRS 4 Insurance Contracts (Amendments): Implementation of IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts. The amendments are effective for annual periods beginning on or after 1 January 2018. The purpose of the amendments is to bridge the gap between the effective date of IFRS 9 and the new IFRS 17 Insurance Contracts. Companies that issue insurance contracts will still be able to adopt IFRS 9 on January 1, 2018. The amendments introduce two alternative approaches - the temporary relief approach and the overlap approach. The temporary exemption allows companies to defer the date of adoption of IFRS 9. The overlapping approach allows companies that apply IFRS 9 from 2018 to eliminate from the gain or loss the effect arising from certain accounting discrepancies that may arise from the application of IFRS 9. IFRS 9 before IFRS 17. The amendments do not apply to the Group.

IAS 40 Investment Property (Amendments): Transfer of Investment Property. The amendments were issued on December 8, 2016, approved by the EU on March 14, 2018. The amendments enter into force for annual periods beginning on or after 1 January 2018. The amendments clarify transfers from or to investment property in the event of a change in management intentions only when there is a proven change in use. The amendments are not applicable to the Group.

IFRIC 22 Reporting Transactions and Prepayments in Foreign Currency Transactions
Issued on December 8, 2016, approved by the EU on March 28, 2018, the Interpretation shall enter into force for annual periods beginning on or after January 1, 2018. The Interpretation addresses the issue of determining the date of the transaction for the purpose of spot fixing. the exchange rate that will be used to convert an asset, income or expense (or part of them) upon initial recognition that is related to the write-off of a non-monetary asset or non-monetary liability arising from a foreign currency payment or prepayment transaction .

Annual Improvements to the Cycle of IFRS Standards 2014-2016 (issued December 8, 2016), approved by the EU on February 7, 2018,
• IFRS 1 - elimination of short-term exemptions that affect the transitional provisions of IFRS 7, IAS 19 and IFRS 10 that are no longer valid.
• IAS 28 - specifies that the choice of mutual funds and other funds to measure their investments in associates or joint ventures at fair value through profit or loss should be made separately for each associate or joint venture upon initial recognition.
The adoption of new standards and changes to existing standards did not result in changes in the Group's accounting policies, except for the application of IFRS 9 and IFRS 15.
Published standards that are not yet in force and have not been adopted before
The following are briefly published standards that are not yet effective or have not previously been applied by the Group at the date of these financial statements. It is disclosed that the disclosures, financial position and results of operations can reasonably be expected to be affected when the Group first adopts these standards. This is expected to happen when they take effect.

IFRS 16 “Leasings”

This standard is with a completely changed concept. It introduces new principles for recognition, measurement and presentation of the leasing by imposing a new model in order to ensure more credible and adequate presentation of this deal for the lessee and the lessor. This standard replaces the instructions of IAS 17. a) the main principle of this new standard is the introdution of one-type model for the accounting treatment of the leasings of the lessees – for all leasing contracts with duration of more than 12 months will be recognized an asset under the form of “right of use”, which will be amotized for the period of the contract, and respectively, will be accounted a financial liability for the obligation in these contracts. This is a significant change in the current accounting practice. For any short-term or leasings of inferior assets, it is allowed an exception and preservation of the practice; b) at the site of the the lessors there should not be any significant changes and they could continue to account the leasings similarly to the old standard IAS 17 – like operative and financial. As far as the new standard gives a more complete concept, one more detailed analysis of the conditions in the contracts follows to be made and from their site and it is possible that at the lessors can happen grounds for reclassification of certain leasing deals. The new standard requires expansion of the disclosures. The management of the Company is in the process of a thorough research of the eventual effects and the cases of contracts for rent and leasing with clients, where changes in the current book-keeping policy will occur;

IFRS 9 Financial Instruments: Classification and Measurement (Amendments): Characteristics of Early Repayment with Negative Compensation

The amendments, effective for annual periods beginning on or after 1 January 2019, while allowing for earlier application, suggest an amendment to IFRS 9 for specific financial assets that would otherwise have contractual cash flows that are only principal and interest payments but do not qualify for eligibility solely as a result of the early repayment with negative offsetting characteristics. In particular, for financial assets with early repayment characteristics that could result in a negative offsetting, the changes require the financial asset to be measured at amortized cost or fair value through other comprehensive income, depending on the valuation of the business model, on which he clings. These changes are not expected to affect the financial position or performance of the Group.
New or revised standards and interpretations issued by the International Accounting Standards Board (IASB) but not yet approved for EU implementation
The following new or revised standards, new interpretations and changes to existing standards, issued by the International Accounting Standards Board (IASB) at the reporting date but have

not yet been approved for implementation by the EU and have not been taken into account in the preparation of this financial report.
• IFRS 17 Insurance Contracts (issued on May 18, 2017)
• IFRIC 23 Uncertainty on Income Tax Treatment (issued June 7, 2017), effective January 1, 2019.
• Amendments to IAS 28: Long-term Interests in Associates and Joint Ventures (issued October 12, 2017), effective January 1, 2019.
• Annual improvements to IFRS 2015-2017 (issued December 12, 2017), effective January 1, 2019.
• Amendments to IAS 19: Modification, Reduction or Settlement of the Plan (issued February 7, 2018), effective January 1, 2019.
• Changes to the references to the conceptual framework in IFRS standards (issued March 29, 2018), effective January 1, 2020.

4.4. Changes in accounting policy

The accounting policies adopted are consistent with those applied in the previous year, except for the new IFRS 9 and IFRS 15 standards, which have been applied for the first time since 1 January 2018.

14 Accounting Policy

14.1 General Position

The most important accounting policies applied to the preparation of these financial statements are presented below.

The consolidated financial report is prepared in compliance with the valuation principles concerning any type of assets, liabilities, revenues, and expenses according to IFRS. The valuation bases are announced in detail in the following points of this accounting policy.
It should be noted that in preparing the consolidated financial report, accounting valuations and assumptions have been used. Although they are based on information, presented to the management as of issuing the consolidated financial report, the real results may differ from the valuations and assumptions.

14.2 Presenting the consolidated financial report

The consolidated financial report is presented according to IAS1 "Presenting financial reports". The company has accepted to present the consolidated report for the comprehensive income in a unified report: consolidated report for the comprehensive income.

In the consolidated report for financial condition two comparative periods are presented, when the company:

a) Applies accounting policies retrospectively;
b) Recalculates retrospectively positions in consolidated the financial report; or
c) Reclassifies positions in the financial report

14.3 Basis for consolidation

The company's financial report has the consolidated financial reports of the parent enterprise and all subsidiaries as of 30.06.2019. Subsidiaries are all companies for which the company controls their financial and operational activities.

The parent company acquires and exercises control by owning more than half of the voting rights. All subsidiaries have an accounting period ending 30.06.2019.

All inside deals and balances are eliminated, including unrealized profit and loss from transactions within the companies. When the unrealized losses from inside company sales of asets are eliminated, the corresponding assets are tested for impairment from the point of view of the companies. The sums presented in the financial reports of subsidiaries are corrected, where necessary in orther to have compliance with the accounting policy used by the companies.
Profit or loss from other comprehensible income of subsidiaries, acquired or sold during the year are recorded as of the date of acquiring or their sale.

Investment in subsidiaries
Subsidiaries included in the consolidation as follows:

Name of subsidiary	Country of establishment and main place of business	Main activity	30.06.2019 ownership %	2018 ownership %
Marina Cape Management EOOD	Bulgaria	Renting and exploitation of real estate	100%	100%
Marina Cape Tours EOOD	Bulgaria	Tour operator activities	100%	100%

14.4 Transactions in foreign currency

Transactions in foreign currency are recorded in the functional currency of the company at the official exchange rate at the date of the transcation (as per the rates of the Bulgarian National Bank). Profits and losses from rate differences arising when settling the transactions and the revaluation of cash positions in foreign currency at the end of the accounting period are recorded in the profit or loss.

Non-monetary positions, valued at historic price in foreign currency are recorded at the exchange rate at the day of the transaction (they are not reevaluated). Non-monetary positions, valued at fair value in foreign currency are recorded at the exchange rate on the day, on which the fair value is determined.

The consolidated financial report of the group, where all assets, liabilities and transactions of the separate companies are in the functional currency, different from BGN (the presentation currency of the group) are recalculated in BGN in the consolidation. The functional currency of the separate companies of the Group is not changed during the accounting period.
At consolidation, all assets and liabilities are revalued in BGN at the final rate at the date of the consolidated financial report. Income and expenses are revalued in the presentation currency of the group at the average rate for the accounting period. Currency rate differences lead to increase or decrease of the other comprehensible income and are recorded in the revaluation reserve of equity. In case of sale of net investment in foreign activity, the currency differences accrued from revaluation, recodded in equity, are reclassified in the profit or loss and are recorded as part of profit or loss from the sale. The reputation and corrections connected to determining the fair

value at the date of acquirement, are treated as assets and liabilities of the foreign company and are revalued at BGN at the final rates.

14.5 Revenues and Expenses

The revenues include revenues from sales of finished goods, investment property and services. Main income - from investment properties, goods and services are presented in the notes.

The revenues are valuated at fair value of the received or receivable compensation, whereas VAT, commercial discounts and quantity rebates, made by the Company, have not been taken into account.
The group often concludes transactions which include the sale of several types of products and services (multi-component sales). The group applies the criteria for recording income, presented below, for each component for this type of deal for sale, in order to reflect its essence. The received remuneration from such a sale transaction is distributed between the separate components based on the ratio of their fair values.
The income is recorded if the following criteria are met:

- The amount of the revenue can be measured reliably;
- It is probable that the economic benefits of the transaction will flow to the Company;
- The costs (both incurred to date and expected future costs) are identified and can be measured reliably;
- The recording criteria, specific to each separate activity of the Group, have been met. They are determined depending on the products or services provided to the customer and in accordance with the contractual conditions set out below.

14.5.1 Sale of investment properties

Income froms sale of investment properties is recorded when the Group values at fair value the received of the receivable payment or compensation, whereas the sum of all commercial discounts and qualitative rebates is taken into account. When exchanging similar assets with similar price, the exchange is not considered as a transaction generating income. Income is recorded at the time of their realization and expenses are recorded by following the principle of comparability with realized revenue.
According to the fair value model all investment properties are valued at fair (market) value at 31.12 of the accounting year, whereas the differene between the balance and fair value is recorded as income or loss from revaluation of investment properties in the Income statement.No depreciation of the investment properties is recorded.

The Group wites off their investment properties at their sale or their permanent Групата отписва инвестиционните си имоти при продажбата им или при трайното им decommissioning in case that no economical benefits are expected from their sale. Profit or loss, arising from their decommissioning or sale are recorded in the Income statement (comprehensible income) and are determined as the difference between the net proceeds from sale and balance value of the asset.

14.5.2 Sale of Goods

Income is recorded when the Group has transferred to the buyer the considerable benefits and risks from ownership of the goods. It is considered that the considerable risks and benefits have been transferred to the buyer when the client has accepted the goods without objection.

When the sale of goods includes promotions for loyal customers, the received remuneration is distributed between the separate components of the sale contract based on their fair value. Income of this type of sale is recorded when the client exchanges the received promotion with products, provided by the Group.

14.5.3 Services

The services offered by the Group include Contracts for property management, brokerage and maintenance (see notes).
Income from services is recorded when the services are provided in compliance with the degree of completion of the contract at the date of the consolidated financial report (see below for more information regarding the metod degree of completion).

14.5.4 Income from interest and dividends

Income from interest is recorded currently at the method of the effective interest rate. The income from dividends, different from the income from investment in associated companies, are recorded at the moment of occurrence of the right to receive payment.

14.5.5 Operational expenses

The operational expenses are recorded in the profit or loss at the time of use of services or the date of their occurrence. The expenses for guarantees are recorded and deducted from their linked provisions at recording the income.

5.5.5 Interest and loan expenses

Interest expenses are recorded currently at the method of the effective interest rate.

The loan expenses mainly are interests on loans of the Group. Loan expenses are recorded as expenses for the period they have occurred in the consolidated income report at row: “Financial expenses”.

14.6 Intangible assets

The intangible assets include Program products. They are recorded at acquisition price including all duty taxes paid, irrecoverable taxes, and direct expenses made in relation to asset use preparation, whereas the capitalized costs are depreciated at the linear method during the period of valuation of useful life of assets, which is considered limited.When acquiring intangible asets as a result of business combination, its cost is equal to the fair value at the day of acquisition.

The following valuation is carried out at acquisition price, decreased by the accrued depreciation and impairment losses. The impairment is recorded as expenses and are recorded in the consolidated income report for the period.

The following expenses, arising in relation to other intangible assets after their initial recording, are recored in the consolidated income report at the period of their occurrence, unless as a result of them, the asset can generate more than the initially estimated future economic benefits and these expenses can reliably be valued and appliet at the asset. If these conditions are met, the expenses are added to the cost of the asset.

The residual value and useful life of other intangible assets are determined by the management of the Group at each reporting date.

Depreciation is calculated by using the linear method on the valued useful term of use of the separate assets as follows:

- Buildings 25 years
- Machinery 3,3 years
- Cars 4 years
- Commercial inventory 6,67 years
- Equipment 10 years
- Computers 2 years
- Others 6,67 years(software)

The chosen threshold of materiality for properties, machinery and equipment for the Group is set at 700 BGN.

5.7. Inventories

Inventories are valued at the lower of cost and net realizable value.
Costs incurred in delivering inventories to their present location and condition are accounted for as follows:

Materials - delivery value determined on the basis of the weighted average method;

Finished goods and work in progress - the value of direct materials used, labor total production costs allocated on the basis of normal production capacity, excluding borrowing costs.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completing the production cycle and those required to make the sale.

5.8. Impairment tests for intangible assets and property, plant and equipment

In calculating impairment, the Group defines the smallest identifiable group of assets for which individual cash flows can be determined - a cash-generating unit. As a result, some assets are subject to an impairment test on an individual basis and others on a cash-generating unit.

All cash-generating assets and units are tested for impairment when events or changes in circumstances indicate that their carrying amount may not be recoverable.

When the recoverable amount of an asset or cash-generating unit is lower than the corresponding carrying amount, the latter should be reduced to the recoverable amount of the asset. This decrease is an impairment loss. To determine the recoverable amount, the Group's management calculates the expected future cash flows for each cash-generating unit and determines the appropriate discount factor to calculate the present value of those cash flows. The data used in impairment testing is directly related to the Group's most recently approved estimated budget, adjusted as necessary to exclude the impact of future reorganizations and significant asset improvements. The discount factors are determined individually for each cash-generating unit and reflect the risk profile assessed by the Group's management.

Impairment losses on a cash-generating unit are allocated to the decrease in the carrying amount of the assets of that unit in proportion to their carrying amount. The Group's management subsequently assesses whether there is any indication that the impairment loss recognized in previous years may no longer exist or be reduced. A previously recognized impairment loss is reversed if the recoverable amount of the cash-generating unit exceeds its carrying amount.

5.9. Investment property

The Group accounts for investment property as buildings that are held for the purpose of earning rental income or raising capital, or both, but also for sale in the ordinary course of business.

Investment property is recognized as an asset in the Group's financial statements only if the following two requirements are met:
• it is probable that future economic benefits will accrue from the investment property
• the value of investment property can be measured reliably.

Investment property is initially measured at cost, including the purchase price and any costs directly attributable to the investment property - such as legal fees, property transfer taxes and other transaction costs.

Upon initial recognition, investment property is accounted for using the fair value model. Fair value is the most probable price that can be obtained on the market at the balance sheet date. Investment property is revalued on an annual basis and is included in profit or loss and other comprehensive income at market value. They are determined by independent appraisers with professional classification and significant professional experience, as well as recent experience in the location and category of the appraised property, based on evidence of market conditions.

The gain or loss arising from a change in the fair value of the investment property is included in profit or loss for the period in which it arises.

Subsequent investment property expenses already recognized in the financial statements of the Group are added to the carrying amount of the assets when it is probable that the Group will receive future economic benefits in excess of the initially estimated value of the existing investment property. All other subsequent expenses are recognized as an expense in the period in which they are incurred.

The Group derecognises its investment property when sold or permanently decommissioned if no economic benefits are expected from their sale. Gains or losses arising from disposal or disposal are recognized in the Income Statement and other comprehensive income and are determined as the difference between the net proceeds of the sale and the carrying amount of the asset.

Rental income and operating expenses related to investment property are reported respectively as 'sales revenue' and 'material costs', 'external service costs' and 'other expenses'. Generally, investment property income (rentals) is investment income and is stated separately.

5.10. Financial Assets

Financial instruments - initial recognition and subsequent measurement

Initial recognition
The Group classifies upon initial recognition of financial assets in the following categories: Measured at amortized cost,

The classification is based on the business model for managing a given class of financial assets and the contractual characteristics of cash flows. Investments held by the Group to obtain profit from short-term sales or repurchases are classified as held-for-sale financial assets. Investments in debt instruments held by the Group within the business model to collect the contractual cash flows are classified as financial assets at amortized cost. Investments in debt instruments held by the Group within the business model for the purpose of collecting the contractual cash flows and selling are classified as financial assets at fair value in other comprehensive income.

Financial assets carried at amortized cost
The following financial assets of the Group may fall into this category, depending on the business model selected and the characteristics of their cash flows: trade receivables, loans and borrowings, leasing receivables, receivables on granted deposits, receivables under cession, receivables, acquired through cessions, loans and loans acquired through cession, held-to-maturity investments.

Trade receivables
Trade receivables are amounts owed by customers for goods or services sold in the ordinary course of business of the Group. They are usually settled within 30 days and are therefore all classified as current. Trade receivables are initially recognized at the unconditional amount received, unless they contain significant financial components, then they are recognized at fair value. The Group holds trade receivables to collect contractual cash flows and subsequently estimates them at amortized cost using the effective interest method.

Other receivables
These amounts generally arise from transactions outside the Group's normal operating activities. Interest may be charged on the basis of market interest rates when the repayment period exceeds six months. Usually the security is not received. Non-current other receivables are due and payable within three years after the end of the reporting period.

Subsequent valuation of financial assets
Financial assets carried at amortized cost
After initial recognition, assets are carried at amortized cost.
Reporting at amortized cost requires the use of the effective interest method. The amortized cost of a financial asset is the amount at which the financial asset is initially recognized, less its principal repayments plus or minus the accumulated amortization using the effective interest rate method of any difference between the original value and the maturity value and less any impairment.

The Group derecognises its investment property when sold or permanently decommissioned if no economic benefits are expected from their sale. Gains or losses arising from disposal or disposal are recognized in the Income Statement and other comprehensive income and are determined as the difference between the net proceeds of the sale and the carrying amount of the asset.

Rental income and operating expenses related to investment property are reported respectively as 'sales revenue' and 'material costs', 'external service costs' and 'other expenses'. Generally, investment property income (rentals) is investment income and is stated separately.

Financial assets at fair value through other comprehensive income
After initial recognition, the asset is measured at fair value, taking into account changes in the fair value of the revaluation reserve of securities investments (other comprehensive income). When a debt instrument is written off, the accumulated gain or loss recognized in other comprehensive income is transferred to profit or loss.

Financial assets at fair value through profit or loss
After initial recognition, the asset is measured at fair value, taking into account changes in fair value in profit or loss.

Impairment of financial assets
The Group recognizes impairment for expected credit losses on all debt instruments that are not carried at fair value through profit or loss. The expected credit losses are based on the difference between the contractual cash flows and all the cash flows that the Group expects to receive, discounted annually at the original effective interest rate.

The amount of expected credit losses recognized as an allowance for impairment depends on the credit risk of the financial asset on initial recognition and the change in credit risk in subsequent reporting periods. Three stages of credit risk deterioration have been introduced, with specific reporting requirements for each stage.

• Stage 1 (regular exposures) - classified financial assets with no indication of an increase in credit risk over the original valuation. For financial instruments for which there was no significant increase in credit risk compared to initial recognition, an allowance for expected credit losses resulting from a possible default in the next 12 months is recognized.

• Stage 2 (impaired exposures) - classifies financial assets with a significant increase in credit risk compared to the initial assessment but without objective evidence of impairment. For those credit exposures for which there has been a significant increase in credit risk compared to initial recognition, recognition is required. Interest is calculated on the basis of the gross carrying amount of the instrument.

• Stage 3 (credit impairment exposures) - classifies financial assets with a significant increase in credit risk and for which objective evidence of impairment exists. For non-performing exposures, credit impairment is recognized for the remaining life of the exposure, regardless of the time of default. Interest is calculated based on the amortized cost of the asset.

Trade receivables and contractual assets

The Group applies the simplified approach of IFRS 9 to measure expected credit losses, which calculates an impairment for life expectancy losses on all trade receivables and contractual assets.

To measure expected credit losses, trade receivables and contractual assets are grouped on the basis of shared credit risk characteristics and days past due. Contract assets relate to work in progress and have the same risk characteristics as trade receivables for the same types of contracts. Therefore, the Group determines that the expected credit losses for 2018 on trade receivables are a reasonable approximation of credit losses on contractual assets.

The Group recognizes in profit or loss - as impairment gain or loss - the amount of expected credit losses (or reversals). When the adjustment for expected credit losses is recognized through other comprehensive income, any adjustment thereto is recognized in other comprehensive income.

Write-off of financial assets

A financial asset is derecognised by the Group when the contractual rights to the cash flows from that asset mature or when the Group transfers those rights through a transaction whereby all material risks and rewards of ownership of the asset are transferred to the buyer. Any participation in an already transferred financial asset, which the Group retains or creates, is accounted for individually as a separate asset or liability.

In cases where the Group retains all or most of the risks and rewards of the assets, the latter are not derecognized from the statement of financial position (an example of such transactions is repurchase agreements).

In transactions in which the Group neither retains nor transfers the risks and rewards of the financial asset, the latter is derecognized when and only when the Group has lost control of the financial asset. The rights and obligations that the Group retains in these cases are accounted for separately as an asset or liability. For transactions in which the Group retains control of the asset, its recognition in the statement of financial position continues, but to the extent that the Group retains its interest in the asset and carries the risk of a change in its value.

Ex-post evaluation of financial liabilities

The subsequent measurement of financial liabilities depends on how they were classified at initial recognition. The Group classifies its financial liabilities into one of the following categories:

Liabilities at fair value through profit or loss
Liabilities are classified in this category when they are principally held for sale in the near future (trade payables) or are derivatives (except for a derivative that is designated and is an effective hedging instrument) or qualify for this category determined on initial recognition. All changes in fair value in respect of liabilities carried at fair value through profit or loss are recognized in the income statement and other comprehensive income as of the date they arise.

Liabilities measured at amortized cost
All liabilities not classified in the previous category fall into this category. These liabilities are carried at amortized cost using the effective interest method.

Items classified as trade and other payables are usually not remeasured as the payables are known for a high degree of certainty and settlement is short-term.
The following financial liabilities of the Group generally fall into this category: trade payables, loans and borrowings, leasing liabilities, deposits received, cession liabilities.

Write-off of financial liabilities
The Group derecognises a financial liability when its contractual obligations are canceled, expired or canceled.
The difference between the carrying amount of the written off financial liability and the consideration paid is recognized in profit or loss.

Offsetting financial asset and financial liability
Financial assets and financial liabilities are offset and a net amount is presented in the statement of financial position when:
• has a legally enforceable right to offset the amounts recognized; and
• intends to either settle on a net basis, or to realize an asset and at the same time settle a liability.

The offsetting of a recognized financial asset and a recognized financial liability and the presentation of the net worth are different from the derecognition of a financial asset or financial liability.
The right to compensation is the legal right of a debtor under a contract to settle or otherwise eliminate all or part of the amount owed to a creditor by deducting from that amount an amount owed by the creditor.

15 Property, plant and equipment

The properties, machinery and equipment, of the Group include land, Computer equipment, transport vehicles. Their book value can be analyzed as follows;

	Land	**Buildings**	**Machinery**	**Transport vehicles and others**	**Expenses for acquiring assets**	**Total**
	‘000	**‘000**	**‘000**	**‘000**	**‘000**	**‘000**

All depreciation and impairment costs are included in the consolidated income statement under "Amortization and impairment of non-financial assets".

The Group has not pledged property, plant and equipment as collateral on its liabilities.

16 Investment property

The properties that are built and for which the Company has received Certificate for exploitation and that are not sold and respectively transferred to clients are reported in the item “Investment property”, because the Company is restricted to operate the constructed assets by itself and it could realize income through assigning the management of those assets to third parties.

The investment properties are valuated initially at their direct cost which includes all the expenditures that are directly related to the particular investment property – such as construction-assembly works, project services, legal fees and other expenditures. After their initial recognition the investment properties are reported through the use of the model of the fair value.

Pursuant to the Special Purpose Vehicles Act the Board of Directors has assigned the completion of revaluation as of 31.12.2017 of all the company’s real estate properties to the independent appraiser – “Dobi 02” Ltd.,

The next table presents the changes in the value of the investment property in 2018 and 2019.

The group is investing in the construction of two sites - Marina Cape and Grand Borovets, a detailed presentation of which is given below.

Marina Cape Property

The Marina Cape Vacation Complex is located in the peninsular part of the Black Sea town of Aheloy, which gives a picturesque view of the bay and the open sea. This is reflected both in the urban solution - the plastic S-shape of the first and second zones, as well as in the design of individual dwellings. A vertical accent in the overall silhouette is the sea light and the clock tower. The complex consists of four separate zones, spread over a property of 40 000 sq.m. and forming a total built-up area of over 66,000 square meters, with a total of 761 apartments. The complex has 4 restaurants, 4 cafes, 14 shops, two squash halls (licensed by the Squash Federation), a room for a Medical and dental center, a fully equipped and working fitness and SPA center, bowling, a children's center, a room intended for bank office, administrative part, offices, two swimming pools and service premises to the respective sites.
Each of the zones consists of separate sectors (27 in total), with the majority being residential, with the exception of the sectors intended for: banking office, sports and entertainment area, children's center and Sector 27 - two-level restaurant. Some of the residential sectors include public facilities - restaurants, cafes, shops, offices, medical center facilities, and fitness facilities. In the central part of the complex there is a swimming pool with a total area of 910 sq.m. with a water bar and a children's pool, and in the northeast there is a pool of 470 sq.m.

The unfinished construction reflects the amount of BGN 295 thousand, which represents the accumulated expenses for the sale of properties in the Marina Cape Resort Complex, which will be recognized as an expense in recognizing the income from the sale by a notary deed or a transferred right of use, when adherence to the principle of income and expense comparability.

Grand Borovets Property
The project envisages the construction of residential properties mainly for holiday use in a separate complex of buildings. The complex bears the trade name "Grand Borovets". It is located in the area of the resort. Borovets. Borovets is located 62 km.

The commercial-administrative area and the service facilities for the complex are located in the ground floor and basement. These include a reception and administration lobby, a lobby bar, a 110-seat restaurant with a banquet hall and a covered terrace, two shops, a ski wardrobe, a fitness and a spa center, an indoor pool, a children's center, a bowling alley, a hairdresser, a reception lounge, and and technical and office space and toilets, including for people with disabilities. The total area of the outlets is 3 140 sq.m. The complex also has a covered two-level parking for 34 parking spaces, as well as an outdoor parking lot with 16 parking spaces.
The residential part of the complex consists of 75 apartments with total built-up area of 5 175 sq.m. They are 41 studios, 14 apartments, mainly one-bedroom apartments and a large variety of penthouses.

Investment property for sale
Revenue from the sale of investment property is recognized when the Group assesses at fair value the consideration or consideration received or receivable, taking into account the amount of all trade discounts and quantitative discounts made to date. When replacing similar assets that have a similar price, the exchange is not considered a revenue generating transaction. Revenues are recognized at the time of their realization and expenses are accrued in accordance with the principle of comparability with the realized income.
In accordance with the fair value model, all investment property is measured at fair value at 31 December of the reporting year, with the difference between the carrying amount and fair value recognized as income or expense from the revaluation of investment property in the income statement. Depreciation of investment property is not charged.

The Group derecognises its investment property when sold or permanently decommissioned if no economic benefits are expected from their sale. Gains or losses arising from disposal or disposal are recognized in the statement of income (comprehensive income) and are determined as the difference between the net proceeds of the sale and the carrying amount of the asset.

17 Intangible assets

The intangible assets of the Company are long-terms assets that include acquired software licenses. Their book value for the current reporting period can be presented as follows:

Intangible assets	**Program Products ‘000 BGN.**	**Total ‘000 BGN.**
Carrying value	**66**	**66**
Balance at June 30, 2019	66	66
Depreciation		
Balance at January 01, 2019	(66)	(66)
Write-off assets	-	-
Depreciation	-	-
Balance at June 30, 2019	(66)	(66)
Book value at June 30, 2019	**-**	**-**

Intangible assets	**Program Products ‘000 BGN.**	**Total ‘000 BGN.**
Carrying value	**66**	**66**
Balance at December 31, 2018	66	66
Depreciation		
Balance at January 01, 2018	(63)	(63)
Write-off assets		
Depreciation	(3)	(3)
Balance at December 31, 2018	(66)	(66)
Book value at December 31, 2018	**-**	**-**

9.1 Inventories

The inventories, recorded in the consolidated report for financial condition, can be analyzed as follows:

	30.06.2019 ‘000 BGN.	**31.12.2018 ‘000 BGN.**
Materials	718	706
Goods	354	354
Inventories	**1 072**	**1 060**

	30.06.2019 '000 BGN.	31.12.2018 '000 BGN.
Fuel-lubricant	17	8
Basic materials	586	585
Materials Bar	10	-
Total:	**613**	**593**

The main materials form the contents of the product of labour or play a main role in its exploitation activity. These are materials with a short term of use which are directly added in the value of the tourist service. These are linen, appliances, foldable temporary beds, curtains for the serviced apartments, spare parts, metal garbage containers, hygiene materials etc.

	30.06.2019 '000 BGN.	31.12.2018 '000 BGN.
Goods in stock - furniture	227	227
General stock – goods	124	122
Total:	**351**	**349**

The company maintains a high level of goods in stock. This is mainly purchased furniture, appliances, tiles. These goods are realized by direct sale to the clients of the company. The goods in the supermarket and bowling bar are mainly food and are sold without any processing whatsoever.

When writing off goods the moderate value method is used – the average price of the goods and separate reporting groups is used.

10 Work in progress

Information about the work in progress by projects is presented in the following table:

Work in progress	**30.06.2019 '000 BGN**	**31.12.2018 '000 BGN**
"Marina Cape" project*	295	295
Total:	**295**	**295**

The reported work in progress represents expenses for property sales – brokerage commissions and advertising expenses for the real estate properties in the "Marina Cape" project amounting to BGN 295 thousand, which shall be recognized as expenditures in the moment of the income recognition (the final transfer of the ownership on the properties or the establishment of the right to use over them).

11 Trade receivables

	30.06.2019 '000 BGN.	31.12.2018 '000 BGN.
Local and foreign persons	459	157

Grand Borovetz 2013 EOOD	3 035	3 035
Advances paid	12	349
Others	-	108
Trade receivables	**3 506**	**3 649**
Deferred expenses on leaseback contract	324	446
Others	1 433	1 023
Other receivables	**1 757**	**1 469**
Current trade and other receivables	**5 263**	**5 118**

The customers' receivables represent non-paid amounts on contracts for transfer of real estate properties in the vacation complex "Marina Cape" as well as unpaid maintenance fees for these properties. The book value of the trade receivables is assumed for reasonable approximate estimate of their fair value.

The group has current receivables from clients with a due date within 180 to 360 days.

All trade receivables of the Company are revised for impairment indications. The Company does not have expectations that the due customers payments will not be paid pursuant to the advanced concluded contracts. All commercial receivables are exposed to a credit risk.

12 Money and money equivalents

Money and money equivalents include the following components:

	30.06.2019 '000 BGN.	31.12.2018 '000 BGN.
Money in banks and in cash:		
- in cash	97	84
- deposits	71	12
- blocked money	7	2
Money and money equivalents	**175**	**98**

The amount of cash and cash equivalents, which was blocked for the Group as at 30 June 2019, amounted to BGN 7 thousand (BGN 2 thousand for 2018). All restrictions on bank deposits removed at the date of approval of the consolidated financial statements do not exist.

13 Tax receivables

	30.06.2019 '000 BGN.	31.12.2018 '000 BGN.
Advance payments corporate tax	-	-
VAT recovery	-	10
Total:	**-**	**10**

14 Equity

14.1 Main/Share capital

The Company`s registered capital consists of 6 011 476 ordinary shares with a nominal value of 1 BGN per share. All the shares are with a right of dividend and liquidation quota and each of them gives a right of one vote in the General shareholders` meetings of the Company.

	30.06.2019 '000 BGN	31.12.2018 '000 BGN
Issued and fully paid shares		
- at the beginning of the year	6 011 476	6 011 476
- issued during the year	-	-
Total shares, authorized as of June 30	**6 011 476**	**6 011 476**

14.2 Revaluation reserve of assets

According to the theory of business valuation, generally, the indications for a fair value of a given property could be calculated using three approaches: market approach, income approach and expenditure approach.
By using the expenditure and market approach the objects are treated as they are in the moment of the valuation. When using the income approach in the valuation of the objects are added also the perspective of their growth – their yield.
In accordance with the objective of the valuations as the most approximate approach for calculating the market value, the valuation team has adopted the "Method of comparative value (market approach). In that case the price of the property is formed on the base of research of realized deals on the market with comparable real estate. The market approach looks for the supposed market price of properties that are similar in quality to the valuated one.
When calculating the market value of the property information about three properties similar to the valuated one, located in the same region and for which deals have been realized in the last six months of the previous year, are used. The sale prices of the three properties are adjusted with an area coefficient that removes differences between them.

In the calculating of the evaluation is used the following:

- Information obtained by the inspection of the object;
- Information and documents about the legal status of the object;
- Newsletters, price lists and reference books of official editions of Ministry of the Regional Development and Public Works, Bulgarian Construction Chamber and etc;
- Information from appraiser`s personal experience.

With Resolution of the Board of Directors the revaluation of the company's assets is assigned to the independent appraisers – "Dobi 02" Ltd.

	30.06.2019 '000 BGN.	31.12.2018 '000 BGN.
Premium reserve from issuing	7 651	7 651
Other reserves	1	1
Reserve from following asset evaluations	5 878	5 963
Total reserves	**13 530**	**13 615**

15 Loans

The loans include the following financial liabilities:

	Current		Non-current	
	30.06.2019 '000 BGN.	**31.12.2018 '000 BGN.**	**30.06.2019 '000 BGN.**	**31.12.2018 '000 BGN.**
Bank loans	-	997	11 735	16 095
Bonds	4 838	4 838	-	-
Financial leasing	118	342	1 394	1 454
Total loans	**4 956**	**6 177**	**13 129**	**17 549**

15.1 Financial leasing as a lessee

The Group has acquired by means of financial leasing land and buildings in construction. The net book value of the asets, acquired by means of contracts for financial leasing is 9 953 thousand BGN. The assets are included in the groups"Land" and "Assets in process of construction from "Properties, machinery and equipment".

The Group has signed two contracts for financial leasing with "Bulgaria Leasing" EAD on December 17, 2013 and with "VEI Prodject" AD from December 30, 2011. The liabilities of the financial leasings are secured by the relevant assets, acquired by means of the financial leasing.

On December 17 2013, the parent company has signed a contract for financial leasing for properties with "Bulgaria Leasing" EAD – lease subject – investment project "Grand Borovets", owned by "Intercapital Property Development" ADSITS.Initially the leasing price should have been paid in 2 years from transferring the right to use the leasing objects, with a grace period during the first six months and 25 leasing payments due on the 20th of the month, at a fixed interest rate of 9 %. By mutual agreement from 2014, the term for making the leasing payments was extended to 20.12.2019 as a result of which the leasing price was changed to 3 183 968.45 euro without VAT. In the end of 2016 the parties signed a new agreement, according to which the term for making the leasing payments was extended to 20.12.2021 and the leasing price was changed to 3 411 746 euro without VAT. According to this contract, on 17.12.2013 "Intercapital Property Development" ADSITS has transferred by notary means the right of ownership on property with identifier 65231.918.189, located in Samokov, Samokov Municipality, Sofia district, as well as the building in the property, namely a hotel apart complex with service units with identifier 65231.918.189.2, to the lessor "Bulgaria Leasing" EAD. As a result of the latter and at the conditions of a leaseback "Intercapital Property Development" ADSITS received possession of the properties, subject of the financial lease, from the lessor

15.2 Bank Loans

Name of creditor	Interest rate	Maturity	Currency in which payments are made
Futures Capital	3.8%	30.01.2027	Euro
ISM Consult	3.8%	30.01.2027	Euro

15.3 Bond issue

The Company issued bond loan in 2007 which was secured only by insurance against financial risk issued by Euroins AD. In the memorandum for the placement of the issue it is stated that the funds were to be used mainly for purchase of land property in Sofia. The bond loan was issued on August 14, 2007. The initial term was 3 years. The amount of the issue was 5 million EUR (9 779 thousand BGN). The principal was to be paid at the end of the period, and the interests to be paid semi-annually. The coupon was 9%. The Company`s total expenditure was estimated to about 9% annually. The initial maturity date of the issue was August 14, 2010.

On August 6th, 2010 the General Meeting of the company's bondholders was held that took the following decisions:
They agreed to restructure the corporate bond issue with ISIN code BG2100019079, by renegotiating the terms of the issue as follows:
1. Extension of the issue by 36 months (from 14.08.2010 to 14.08.2013);
2. Interest on the bond is amended to 9.5% and it is payable every three months;
3. Scheme to repay the bond loan is amended as follows:
3.1. Collateral under Art. 100h, para. 1 of the Civil Insurance Act: Insurance of Euro Ins AD, covering the risk of non-payment by the Issuer of interest or principal for the new term of the issue.
3.2. Additional collateral: Establishment of second mortgage on 7 835.99 sq. M. Marina Cape, Aheloy (described in the appendix to the written materials), in favor of the trustee of the bondholders CB Investbank AD within not more than one month after the date of this General Meeting.
The Company has the right to repay all or part of the remaining principal on the bonds ahead of schedule. Repayment may be made only on an interest payment date and after one month's notice to the bondholders. The minimum amount the company can repay in part and early is EUR 250,000 or 5% of the initial issue amount.

In fulfilment of the obligations in relation to renegotiating the conditions of the bonds and for securing the receivables of the bondholders a second in line mortgage was established on 24 (twenty four) separate commercial properties of total area of 7 835,99 m2, owned by the company, located in Marina Cape, Aheloy, Pomorie Municipality, Burgas district. The mortgage contract was signed by notary deed for contractual mortgege on 01.09.2010, № 158, vol. IV, reg. № 3289, case № 732/2010 of Gergana Nedina – notary public.

In addition, in connection with the conclusion of insurance with Euro Ins AD covering the risk of non-payment by the Company of interest or principal for the new term of the issue, and in order to secure the receivable of Euro Ins AD to Intercapital Property Development of an amount of EUR 84,000, representing a part of the value of the insurance premium payable under the insurance policy, amounting to EUR 104,000, a first contractual mortgage was established in favor of Euro Ins SA on two separate sites with a total built-up area an area of 108.65 square meters, own t of the Company, located in Marina Cape town. Aheloy, Municipality Pomorie, Burgas. The mortgage contract was concluded under a Notarial Deed for the Establishment of a Contractual Mortgage of August 9, 2010, No 81, Volume IV, Reg. No. 2884, Case No 656/2010 to Notary Gergana Nedina.

At the General Meeting held on 6th February 2013 of the bondholders of Intercapital Property Development ADSIC a proposal to restructure the Company's bond loan was adopted.

The proposed agenda was as follows:

Giving consent for rescheduling and restructuring of the obligations on emission ISIN code BG2100019079, through renegotiation of some of the conditions as follows:

1. Extension of the term of the issue by 60 months (as from 14 August 2013 until 14 August 2018);

2. Interest (coupon) payments within the extended term:

2.1. The interest rate following 14 Feb 2013 until the maturity date shall be decreased to 7.25% per annum, payable at 3-month period on the dates as per the Table enclosed in the invitation;
2.2. The interest payments due following 14 February 2013 until the maturity date shall be calculated by gradual decrease of the interest rate by 0.25%. The exact amount of the interest payments as well as the terms for applying the new gradual decrease of the interest rate are specified in the invitation and in the table enclosed;
3. The Issuer shall be still entitled to make a total or partial early repayment of the outstanding principal of the debenture loan. That repayment might be effected only on a date of an interest payment. The minimum amount that might be early repaid must equal at least one amortisation payment due for the respective period;
4. Security of the issue: Except for the insurance provided by Insurance Company Euro Ins and the second-tier mortgage, the Issuer shall be obligated to provide new additional collaterals such as: to sign a supplement to the insurance policy provided by Euro Ins and to create a first-tier mortgage on an own real property as described in the invitationn
5. Other terms and ratios:
5.1. Ratio between Equity and Secured Debt: The Company undertakes to maintain a ratio between equity and secured debt, calculated by dividing the balance sheet equity capital of the Company to the sum of all collateralized obligations, not lower than 0.10 (zero point ten) until the full payment of the bonds of this issue.
5.2. Maximum ratio of Liabilities to Assets according to their book value: The Company undertakes to maintain a maximum ratio of the book value of its Liabilities to the book value of its Assets at an amount of not more than 0.95 (zero point ninety five) until the full payment of the bonds of this issue.

At a meeting of the Board of Directors of BSE-Sofia AD under Minutes № 8/11.02.2013, it was decided to change the parameters of the issue of debentures of the Company admitted it to Segment of the BSE-Sofia. The changes were reflected on BSE with effect from 13.02.2013.

With the establishment of a mortgage ICPD fulfill its obligation to provide collateral on outstanding, as of the date of the meeting, bond loan of € 3,500,000 (three million five hundred thousand euro), together with interest due.

On 11/02/2015, there was a General Meeting of Bondholders of corporate bonds with ISIN code BG2100019079, issued by the ICPD. Pursuant to Art. 214 para. 1 of the CA General Meeting of Bondholders was convened by the representative of the bondholders "InvestBank" AD. At the meeting the following decisions on relevant agenda items were adopted.

On the first point was given for rescheduling and restructuring of the obligations on the issue of corporate bonds with ISIN code BG2100019079, by renegotiating the terms of the issue as follows:
1. Extension of the issue 24 months (from 14.08.2018 years - until 14.08.2020 years);
2. Scheme for repayment of the bond loan and interest shall be amended as follows:
2.1. The principal shall be paid to the following contributions:

2015	2016	2017	2018	2019	2020
Date/amount (euro)	Date/amount (euro)	Date/amount (euro)	Date/amount (euro)	Date/amount (euro)	Date/amount (euro)
14.02./ 62 500	14.02./ 62 500	14.02./ 125 000	14.02. /125 000	14.02./ 187 500	14.02./ 250 000
14.05./ 62 500	14.05./ 62 500	14.05./ 125 000	14.05./ 125 000	14.05./ 187 500	14.05./ 250 000

14.11./ 62 500	14.11./ 62 500	14.11./ 125 000	14.11./ 125 000	14.11./ 187 500	

3. Interest payments are due under the following conditions:
3.1. The agreed interest rate on the bond loan will be reduced to 6% on an annual basis from 14.02.2015.
3.2. The possibility of applying a step for the reduction of the interest rate on the bond loan in the amount of 0.25% (zero point twenty five percent) is retained only on condition that there is prompt payment of interest and principal payments, until the interest rate reaches 5% annually. The principles and interest payments are considered to be paid on time in the event that the total amount payable for the preceding quarter, was ordered to the bank account of the "Central Depository" AD servicing debenture loan payments no later than two working days before the corresponding maturity.

3.3. Interest on the debenture loan is payable quarterly on the dates indicated in the table below:

Date of interest payment	Days in interest period	Days	Interest rate	Amount of due interest (EUR)
14.02.2015	92	365	7,00%	52 932
14.05.2015	89	365	6,00%	42 976

14.02.2018	92	365	5,00%	25 205
14.05.2018	89	365	5,00%	22 860
14.08.2018	92	365	5,00%	22 055
14.11.2018	92	365	5,00%	20 479
14.02.2019	92	365	5,00%	18 904
14.05.2019	89	365	5,00%	16 002
14.08.2019	92	365	5,00%	14 178
14.11.2019	92	365	5,00%	11 815
14.02.2020	92	366	5,00%	9 426
14.05.2020	90	366	5,00%	6 148
14.08.2020	92	366	5,00%	3 142

4. If, within three (3) days before the expiration of 30 days from the maturity of any outstanding principle and/or interest payment the issuer fails to submit to the bondholders' trustee the document that the payment is made in a bank account "Central Depository" AD, servicing debenture loan payments, it is considered to be the event of default on the bond issue as "Investbank" AD may exercise their rights of bondholders' trustee, under contract with the Issuer and the relevant laws.

5. The bondholders agree that any payment under the terms of the issue within the period prescribed under p. 3 will be considered for payment under the issue and will not give rise to any adverse effect on the Issuer. Payment to meet the conditions of the previous sentence can be done both by the Issuer and by any third party.

6. All other conditions of the bond issue issued by "Intercapital Property Development " ADSIC, except from the expressly stated above shall remain in force and retain their effect as originally agreed, respectively renegotiated by the General Meeting of Bondholders.

As the Company failed to pay the interest due on 14.08.2017 in the amount of EUR 32,610 and principal amounting to EUR 125,000, the Company informed Investbank AD, FSC, BSE and the public that on the grounds of Item 1, Section VII of Insurance Policy No 29 - 0000 - 1753 / 06.08.2010, as amended by Addendum No 4 of 11.02.2015, it will be considered that on September 13, 2017 at 17:30, there is an insurance event whereas the occurrence of an insurance event in respect of a specific three-month principal payment and / or contractual interest does not automatically lead to the occurrence of an insured event with regard to subsequent payments.

By letter with reference number No 2989/6 of 03.10.2017, EUROINS AD as an insurance policyholder concluded in connection with the provision of collateral to the bondholders on the bond issue issued by ICPD ADSIC, notified Investbank AD, in its capacity of trustee of the bondholders acting as insured person and secured creditor of the receivables of all bondholders, and ICPD ADSIC, that from 00.00 h on 03.10.2017 the insurer terminates the insurance contract from 11.02.2015 with insurance policy number 29-0000- 1753.
The notification states that in connection with an application filed by "Investbank" AD No 2989/4 / 28.09.2017 for payment of an insurance indemnity for the aforementioned insurance policy for a total amount of EUR 157,609.59 (one hundred and fifty seven thousand six hundred nine euro 59 eurocents) representing the amount of the due interest and principal payment under the bond loan as of 14.08.2017, the "EUROINS" AD will exercise its right under Art. 364, para.

4 CC in the event of a terminated insurance policy and will apply a 50% (fifty percent) reduction of the indemnity for an insurance event occurring prior to the date of termination of the insurance contract.
As a result on October 5th 2017, a partial depreciation payment of EUR 78,805 was made on the bond issue issued by the “Intercapital Property Development” ADSIC, which had matured on 14.08.2017. The amount for the above amortization payment on the debenture loan issued by "Intercapital Property Development”" ADSIC was deposited in a bank account of the Central Depository AD by EUROINS AD as an insurance policyholder concluded in connection with the provision of collateral to the bondholders of the bond issue issued by the Company.
On 24.10.2017 “Intercapital Property Development” ADSIC was informed by Investbank AD that the trustee declared the entire debenture loan of the issuer due early due to the fact that the dropping of the contracted debt insurance collateral constituted a material breach of the issuer's obligations under the prospectus as well as due to the circumstance, that the overdue of part of the obligations on the issue (due on 14.08.2017) lasts more than 30 days.
At a meeting of the Board of Directors of BSE-Sofia AD under Protocol No. 55 / 26.10.2017 and on the grounds of Art. 39, para. 1, item 4 of Part III Rules for admission to trading by the Rules and Regulations of BSE-Sofia AD, the Board of Directors of BSE-Sofia has finally ceased the registration of the issue of bonds issued by ICPD ADSIC with effect from 27.10.2017.

30 Risk related to financial instruments

Aims and policy of the management regarding risk management
The Group is exposed to various risks in relation to its financial instruments, the most important of which are: market risk, credit risk and liquidity risk.

The risk management of the Group is carried out by the BD of the parent company, assisted by IP Intercapital Markets AD, which has a contract for valuation and risk management of the Group in collaboration with the BD. It is a priority for the BD to supply the short term and long term cash flows by reducing its credit exposition. Long term financial investment are managed to generate long term return.

The parent company does not have the right to trade on the financial markets.

The structure of the Company's financial assets and liabilities as of 30th June by category is shown below. It includes all financial assets in a group - "loans and receivables", and all financial liabilities in one group - "other financial liabilities":

	30.06.2019 '000 BGN.	31.12.2018 '000 BGN.
Credits and receivables		
Financial Assets		
Receivables from clients and other receivables	5 263	5128
Money	175	98
Total	**5 438**	**5 226**
Other financial liabilities		
Financial liabilities		
Liabilities towards suppliers and other liabilities	47 305	43 755
Total:	**47 305**	**43 755**

(a) Market risk

(-) Currency risk. The expenses of the Company are denominated in BGN or in EUR. In BGN denominated expenses are associated with the construction and operation of real estate. The cost of the real estate most often is negotiated in BGN. On the other hand, almost all other earnings are negotiated in EUR. In a currency board and fixed exchange rate of the lev against the euro, currency risk for the company is virtually none.

In conducting of transactions in foreign currency there are currency gains and expenses which are included in the Income Statement. During the reporting period the Company has not been exposed to currency risk, in so far as no positions have occurred in currencies other than the lev and euro.

The policy on currency risk management applied by the company is not to have substantial operations and do not maintain open positions in foreign currencies other than Euro.
The financial assets and liabilities, which are denominated in foreign currency are revalued in BGN at the end of the accounting period

Interest rate risk
The Group may be exposed to interest rate risk if there is a mismatch between the type (fixed or floating income, respectively interest) of assets and liabilities. The main assets of the Company are property (land or those under construction). It could be assumed that these assets are fixed-price or income because their price is not affected directly by changes in interest rates. The Group will seek to finance these assets in debt instruments, which also have a fixed rate. Where this is not possible or not favorable to the company, it may use a floating-rate debt. In these cases the Company will constantly analyze forecasts on interest rates. In case of significant risks of a large increase in interest rates, which have a significant negative impact on profits of the company, it may use derivatives or other financial instruments to hedge this risk. These may be contracts for swap payments from floating to fixed interest rate, futures or other instruments. As of June 30, 2018, the bigger part of the liabilities of the Group are with floating rate, based on EURIBOR. In this regard, the company is exposed to risk if the base interest in the Eurozone rises.

It must be noted that, the possible increase of market interest rates will possibly reflect unfavorably on the prices and demand for properties as a large part of these deals is financed through loans.

The policy of the Group is towards minimizing the interest rate risk during long term financing.

(b) Analisys of the Credit risk

In its activity the Company may be exposed to credit risk when it pays in advance (grant advances) to its suppliers or has sales receivables (including the sale with deferred payment). Group policy provides for the avoidance of advances as much as possible. Yet when these are imposed (e.g. purchase of windows, elevators and etc. for buildings under construction), the Company will analyze in detail and depth the reputation and financial condition of the suppliers and if necessary will require a bank and other guarantees of good performance. Similarly, in the conduct of sales of goods and services and providing loans to customers, the Company will focus on the credit standing of counterparties.

(c) Liquidity risk

Liquidity risk arises in connection with securing funding for the activities of the Company and its management positions. It has two dimensions - risk the Company will not be able to meet its obligations when they fall due and the risk of being unable to realize company assets at an appropriate price and within acceptable limits.
The company aims to maintain a balance between maturity of funding and flexibility of the use of funds with varying maturity structure.
The company aims to reduce the risks of a shortage of cash by making investments and works only when the financing is secured with its own funds, advances from customers or borrowings. Company monitors closely the financial markets and the opportunities for raising additional funds (own or debt). The company seeks to shorten the time to raise such funds as necessary.

31 Policy and procedures for capital management

The Company's objectives associated with the capital management are as follows:

- to ensure capacity so that the Company can continue to exist in compliance with the going concern principle; and
- to ensure adequate return for the shareholders by determining the price of their products and services in accordance with the level of risk.

The Group manages the equity based on the ratio of corrected equity to net debt.

The Company manages the capital structure and makes the necessary adjustments in accordance with changes in the economic environment and risk characteristics of the respective assets.

To maintain or adjust the capital structure, the Company may change the amount of the dividends distributed to the shareholders, may return capital to the shareholders, may issue new shares and may sell assets in order to reduce its liabilities.

The equity for the presented reporting periods may be analyzed as follows:

	30.06.2019 '000 BGN.	**31.12.2018 '000 BGN.**
Equity	6 011	6 011
+Increase	-	-
- Decrease	-	-
Corrected equity	**6 011**	**6 011**
Total equity:	**6 011**	**6 011**
